

## WeNipol light board

- WeNipol is specially designed for emergency services and road services
- It displays any static and or dynamic signs, symbols or texts in any language to suit all requirements by using Nissen remote control with LCD display for cable/radio operation
- The remote control could be permanently mounted inside the driver's cabin
- Highly legible signs, texts or symbols even during bright daylight conditions with patented technology (no phantom light)
- Automatic brightness adjustment for day and night time conditions
- The remote control always indicates the sign which is displayed on the VMS matrix
- High quality steel frame with lifting and lowering motor
- On exceeding pre-set speed limits, WeNipol folds down to closing position preventing any damage to the system (GPS system)
- All photometric values are BS & European Norm EN 12966 compliant
- Also available with integrated amber or blue flashers (St+)
