The UK's Leading Traffic Management Vehicle Specialist

Designed and built by those who use them

VSA Lighting Board

- LED based Light Arrow system specifically designed for impact protection and traffic management vehicles
- System consists of LED light arrow board at the top and 610 arrow on the bottom
- Top and bottom boards are inter-linked with an arrow motor enabling the operator to switch on the light with the corresponding 610 arrow
- High grade micro-processor controlled electronics
- Galvanised framework with grey aluminium backing board for the light arrow
- Easy to operate with cab-fitted remote control – which displays the arrow positions on the light board
- Ultra-bright light arrows with single 220mm dia LED Zyklon classic lamps and 2-fold 340mm dia LED lamps can be seen from far distance
- Fully BS and EN norms compliant and meets Charter 8 requirements
- A vertical Lift version is also available
